

THE FUTURE ENVELOPE NEXT BUSINESS

#11

CONFERENCE ON BUILDING ENVELOPES

FACULTY OF ARCHITECTURE TU DELFT (NL) | THURSDAY 22. JUNE 2017

NEXT Business is organised by the Facade Research Group, TU Delft in cooperation with the European Façade Network (EFN)

'Next Business' aims at answering the following questions:

What are the **trends** that determine the future of the building envelope? Which business concepts can be found to react to these trends and what can we learn from other industries? What are the **legal and financial implications** for a different approach? How will new business concepts **shape our façade products and services**?

During the 11th edition of the annual conference, twelve international speakers from research, industry, management and design will share their experience and visions of the future building envelope.

PROGRAMME
